

13 - Deployment DevOps Requirements

Visor DOM-to-Agent Context Compiler
DOC-13 | 0.1 requirements pack | Generated 2026-06-14

This deployment document defines local build/install flow, build artifacts, CI future, release checklist, and versioning.

Field	Value
Owner	Rohan PX / Visor project
Audience	AI coding agent, reviewer, future contributors
Status	Draft baseline for MVP build
Decision rule	MVP is local-first, minimal-permission, Chrome Manifest V3, no backend unless explicitly enabled.

Document control

Item	Value
Project	Visor DOM-to-Agent Context Compiler
Document code	DOC-13
Generated on	2026-06-14
Primary goal	Turn raw webpage DOM into safe, structured, agent-ready context.
MVP boundary	Chrome extension, local-only compiler, JSON/Markdown export, privacy redaction, tests.

1. Deployment position

For MVP, deployment means a local unpacked Chrome extension build that developers can install from the dist folder. Store publishing, CI, signing, and backend deployments are future steps after compiler quality and security are proven.

2. Local development commands

```
npm install
npm run dev
npm run typecheck
npm run test
npm run build
```

Chrome manual install:

1. Open `chrome://extensions`
2. Enable Developer mode
3. Click Load unpacked
4. Select the `dist/` folder
5. Pin Visor and test on fixture pages

3. Build artifacts

Artifact	Purpose	Required for MVP
dist/	Unpacked extension folder.	Yes
visor-extension.zip	Chrome upload/store package later.	No for first local MVP
coverage/	Test coverage report.	Recommended
fixtures/	Local test pages.	Yes
README.md	Install/build/test instructions.	Yes
CHANGELOG.md	Version history.	P1

4. CI pipeline future

- Install dependencies with lockfile.
- Run typecheck.
- Run lint.
- Run unit tests.
- Run fixture integration tests.
- Build extension.
- Upload build artifact.
- Generate release notes from changelog.

5. Release checklist

ID	Requirement	Priority	Acceptance signal
REL-001	Version is updated in manifest and package file.	P0	Version numbers match.
REL-002	Permissions are reviewed and documented.	P0	README includes permission explanation.
REL-003	No external AI/backend endpoints are configured in MVP.	P0	Config scan and network test pass.
REL-004	Fixture tests pass.	P0	CI/manual test report available.
REL-005	Privacy policy draft exists before public store release.	P0 public	Policy explains local-first behavior.
REL-006	Store listing does not overclaim capabilities.	P0 public	Description matches implemented MVP.

6. Versioning

Version	Meaning
0.1.x	Local MVP compiler and popup.
0.2.x	Better extraction, debug inspector, settings.
0.3.x	Site profiles and RAG mode.
1.0.0	Stable public extension with validated schema and documented privacy posture.
